WALLET.FORMION.AI

01 · ABOUT FORMION

Who we are

Formion AI is a multi-asset, AI-powered trading platform: crypto, forex, stocks, commodities, options and prediction markets in one ecosystem, with FORA — the AI layer that screens, analyses and helps execute. Token projects meet our users in two places:

Formion Wallet

Self-custody wallet at **wallet.formion.ai** on Ethereum, Base, Arbitrum, BNB Chain, Solana, Tron and Sui. Keys stay in the user's browser. Swap, Discover, Explorer, Alerts and Radar live here — and so does your token profile.

Coins Hub on app.formion.ai

The market overview inside the Formion trading app. Verified token profiles get a card there with badge, KYC / audit chips and a direct link to the full project page.

Our own token, held to the same standard — FOM

1,000,000,000 fixed

ERC-20 on Base, minted once. No mint, pause, tax or blacklist; no owner.

LP locked 24 months

Uniswap v3 FOM/WETH 1 % pool, locked on UNCX, owned by a 2-of-3 Safe.

Audited · KYC

Audited by SolidProof (0 critical / high), founder KYC verified by SolidProof.

No presale

No presale, no private sale, no ICO, no launchpad. Founder-funded launch.

Live since 14 Oct 2026

Trading opened on Uniswap (Base) on Wed 14 Oct 2026.

Utility only

FOM unlocks the FORA Agent levels; 75 % of FOM paid for agent credits is burned.

Our channels

@FormionAI · Channel @formionai · Community @formionaichat · YouTube @Formion_AI · formion.ai

Facts on this page come from formion.ai/fom, the Formion whitepaper and docs.formion.ai. We do not publish audience numbers we cannot prove; ask us for current figures before you book.

02 · OVERVIEW

What your project gets

One profile connects everything Formion shows about your token. You write the story; **we add the data** — read from the chain by our own indexer, never typed in by anyone.

Verified token profile

Logo, links, description and banner — with a Blue "Verified profile" or Gold "Verified + KYC" badge after review.

Rich project page

Cover, YouTube videos, gallery, whitepaper and deck, tokenomics, roadmap, partners, FAQ and your news — one page, one link.

Explorer data

Candles, pair info, trades, top traders, whale trades, holders and bubble map, pools — for your token on Base, Ethereum, Arbitrum, BNB Chain.

Risk Scan

Honeypot, taxes, mint, owner, LP lock, holder concentration and a real buy + sell simulation — 0–100 score shown next to your profile.

Coins Hub card

A card on app.formion.ai Coins Hub with your badge, KYC / audit chips and a link to your page.

Promotion menu

Boost, banner, Spotlight, sponsored posts, AMA, videos, alerts and newsletter — always labelled "Sponsored" / "Ad".

What payment can never buy

- ✕ FORA answers, FORA signals or FORA Neurons alerts
- ✕ Risk Scan scores, badges or Explorer rankings
- ✕ Hiding a risk flag or a holder
- ✕ A "recommended" or "safe to buy" statement

- ✓ Visibility in clearly labelled places
- ✓ A verified, reviewed profile users can trust
- ✓ Your own story, media and documents
- ✓ Our real on-chain data next to it

Where your token appears

Explorer	Project page	Coins Hub	Our channels
wallet.formion.ai	one shareable link	app.formion.ai	X · Telegram · YouTube

Verification ≠ endorsement. A badge means the project proved it controls the token, paid and passed our review and Risk Scan. It is not investment advice and not a recommendation.

03 · TOKEN PROFILE

Two badges. One honest rule.

A badge is only ever shown with a payment **and** a clean Risk Scan. Free listings show a neutral "Listed profile", never Verified.

Verified profile — **$10** one-time

- Paid on-chain (USDC, USDT, ETH or FOM)
- Risk Scan safe (no honeypot, no critical flag)
- Proof you control the token: signature from the deployer / owner, or a code posted on your official X or website
- Content review by Formion
- All project-page sections included

Verified + KYC — **$49** one-time

- Everything in Verified
- Team KYC by an allow-listed provider (e.g. SolidProof, CertiK, Assure DeFi, PinkSale, Cyberscope)
- Audit by an allow-listed auditor (e.g. SolidProof, CertiK, Hacken, PeckShield, OpenZeppelin)
- LP ≥ 90 % locked or burned for ≥ 12 months — checked on-chain
- Upgrade from a paid Blue: $39

Pay in FOM: −50 %

FOM is priced at the lower of the 7-day and 30-day pool average, so a short spike never changes your price.

Daily re-check

Every day we re-run the Risk Scan. It can only **lower** a badge (risk flag → suspended, LP unlocked → Gold becomes Blue). Only the Formion team can raise it again, after a review.

Updates are free

Edit your page any time. New links or contracts need a fresh ownership proof; the old page stays live until we approve.

Real screenshot · dark theme, mobile

What users see

Verified + KYC	paid Gold · KYC · audit · LP lock
Verified profile	paid Blue · Risk Scan safe
Listed profile	free listing — never "Verified"
Suspended	risk flag found → badge hidden

KYC and audits are proven **only** by the provider's own public page, which the Formion team opens and checks. Formion never performs KYC and never collects documents. Next to every badge users see: "Verification ≠ endorsement".

04 · PROJECT PAGE

A full project page, included

Every paid profile can fill 15 sections. All are optional; the more you add, the more a trader can check without leaving the wallet.

Basics
Tagline, description, category, launch date

Cover 16:5
1600 × 500 banner on top of your page

YouTube
Up to 3 videos, privacy-friendly click-to-play

Gallery
Up to 8 images with captions + lightbox

Whitepaper & deck
PDF ≤ 15 MB (cleaned by us) or a link

Links & audits
Site, socials, GitHub, Medium, CoinGecko, CMC

Tokenomics
Allocation donut, vesting, stated vs measured tax

Team
"Team KYC" label only with Gold + KYC

Roadmap
Done / now / next phases

Partners
Partner logos, marked "provided by project"

Where to trade
DEX pools from our index + your CEX links

Other chains
Each extra contract verified on-chain

FAQ
Your answers to the usual questions

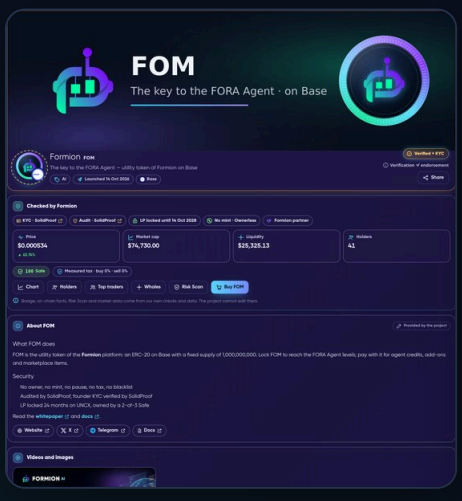

News, events, AMAs
Posts appear after Formion approves them

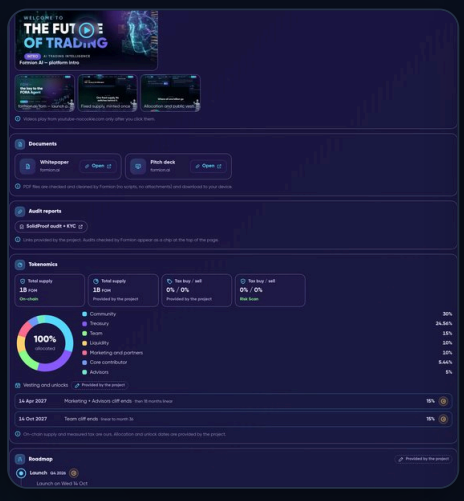

Checked by Formion
Our block: badge, facts, Risk Scan, market — never editable

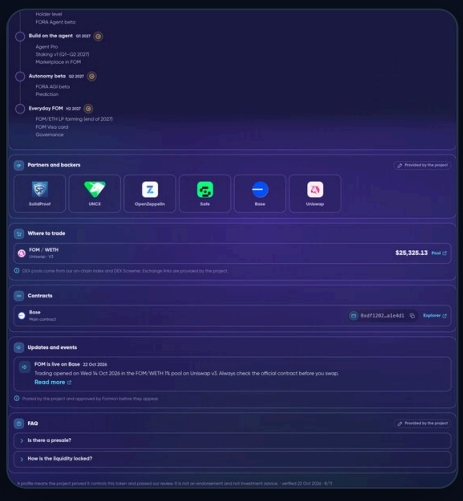

Images are re-encoded by our media guard (no SVG), PDFs are scanned and rewritten without scripts or attachments and only offered as downloads. Links open with no-follow. Deep link to your page: **wallet.formion.ai/wallet#tok=<chain>:<contract>&view=profile**

The whole FOM page, top to bottom

Real screenshot · FOM example

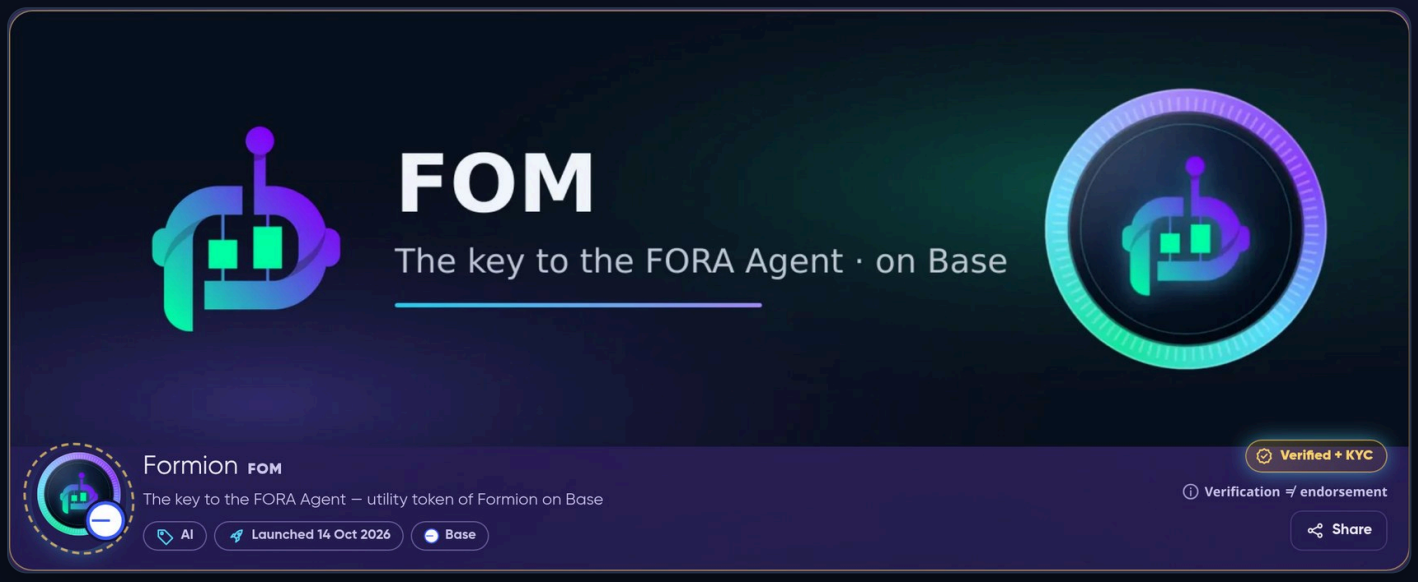

05 · EXAMPLE: FOM

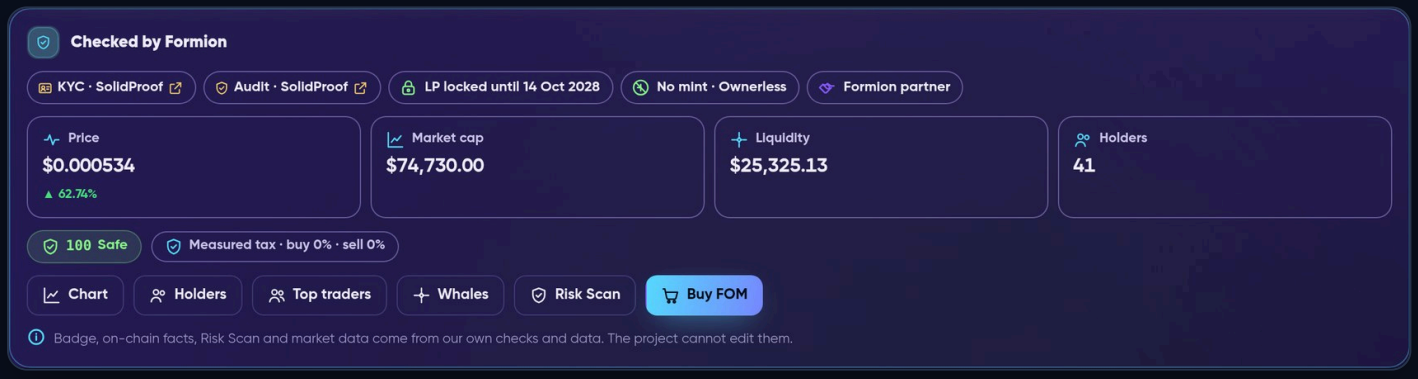

This is what users see

Our own token, FOM, set up as a Gold profile in the live wallet — desktop at 1440 px and mobile at 390 px, Formion theme.

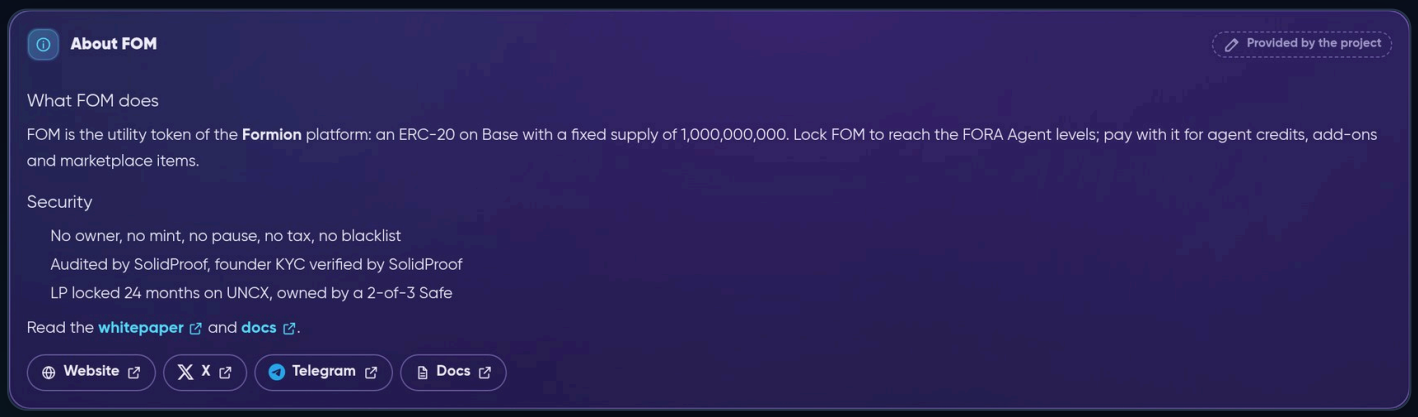

Real screenshot · FOM example

Header: cover, logo, category, launch date, network — and the Gold "Verified + KYC" badge with "Verification ≠ endorsement".

"Checked by Formion": KYC + audit chips, LP lock date, no-mint / ownerless, live price, market cap, liquidity, holders, Risk Scan score.

"About": the project's own text, formatted, with its links — labelled "Provided by the project".

05 · EXAMPLE: FOM

Your story, next to our data

Real screenshot · FOM example

Tokenomics

Total supply	Total supply	Tax buy / sell	Tax buy / sell
1B FOM	1B FOM	0% / 0%	0% / 0%
On-chain	Provided by the project	Provided by the project	Risk Scan

Community	30%
Treasury	24.56%
Team	15%
Liquidity	10%
Marketing and partners	10%
Core contributor	5.44%
Advisors	5%

Vesting and unlocks · Provided by the project

14 Apr 2027	Marketing + Advisors cliff ends · then 18 months linear	15%
14 Oct 2027	Team cliff ends · linear to month 36	15%

On-chain supply and measured tax are ours. Allocation and unlock dates are provided by the project.

Tokenomics: on-chain supply next to the project's numbers; tax measured by our Risk Scan next to the stated tax. Differences are flagged.

Videos and images

Videos play from youtube-nocookie.com only after you click them.

Videos and gallery: YouTube loads only after a click; images are re-encoded and served by Formion.

Documents

Whitepaper	Pitch deck
formion.ai	formion.ai
Open	Open

PDF files are checked and cleaned by Formion (no scripts, no attachments) and download to your device.

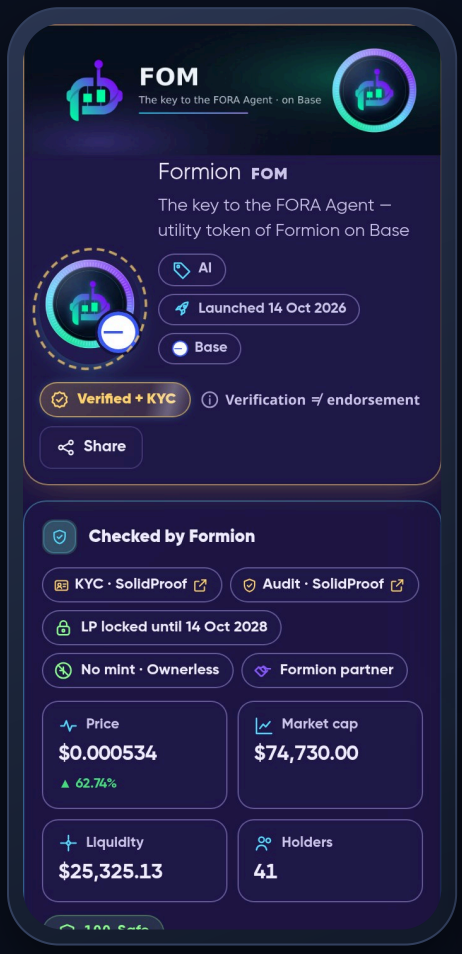

Whitepaper and pitch deck: a link, or a PDF we clean and offer as a download.

05 · EXAMPLE: FOM

Roadmap, partners, news — on mobile

Every section is built for a 390 px phone screen first. Real screenshots from the wallet, Formion theme.

Real screenshot · FOM example

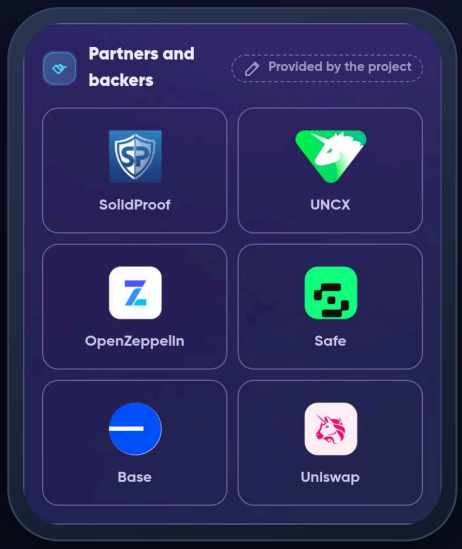

Profile header + Checked by Formion

Roadmap

Where to trade

Partners (real logos)

News approved by Formion

06 · EXPLORER

Live on-chain data, read by us

Explorer → Tokens works for any token on Base, Ethereum, Arbitrum, BNB Chain and Solana. For indexed tokens we add depth, flow by trade size, top traders, whale trades and holder history.

Real screenshot · FOM example

Candles (5m–1d) and pair card: DEX, liquidity, pooled amounts, pool age, holders, links.

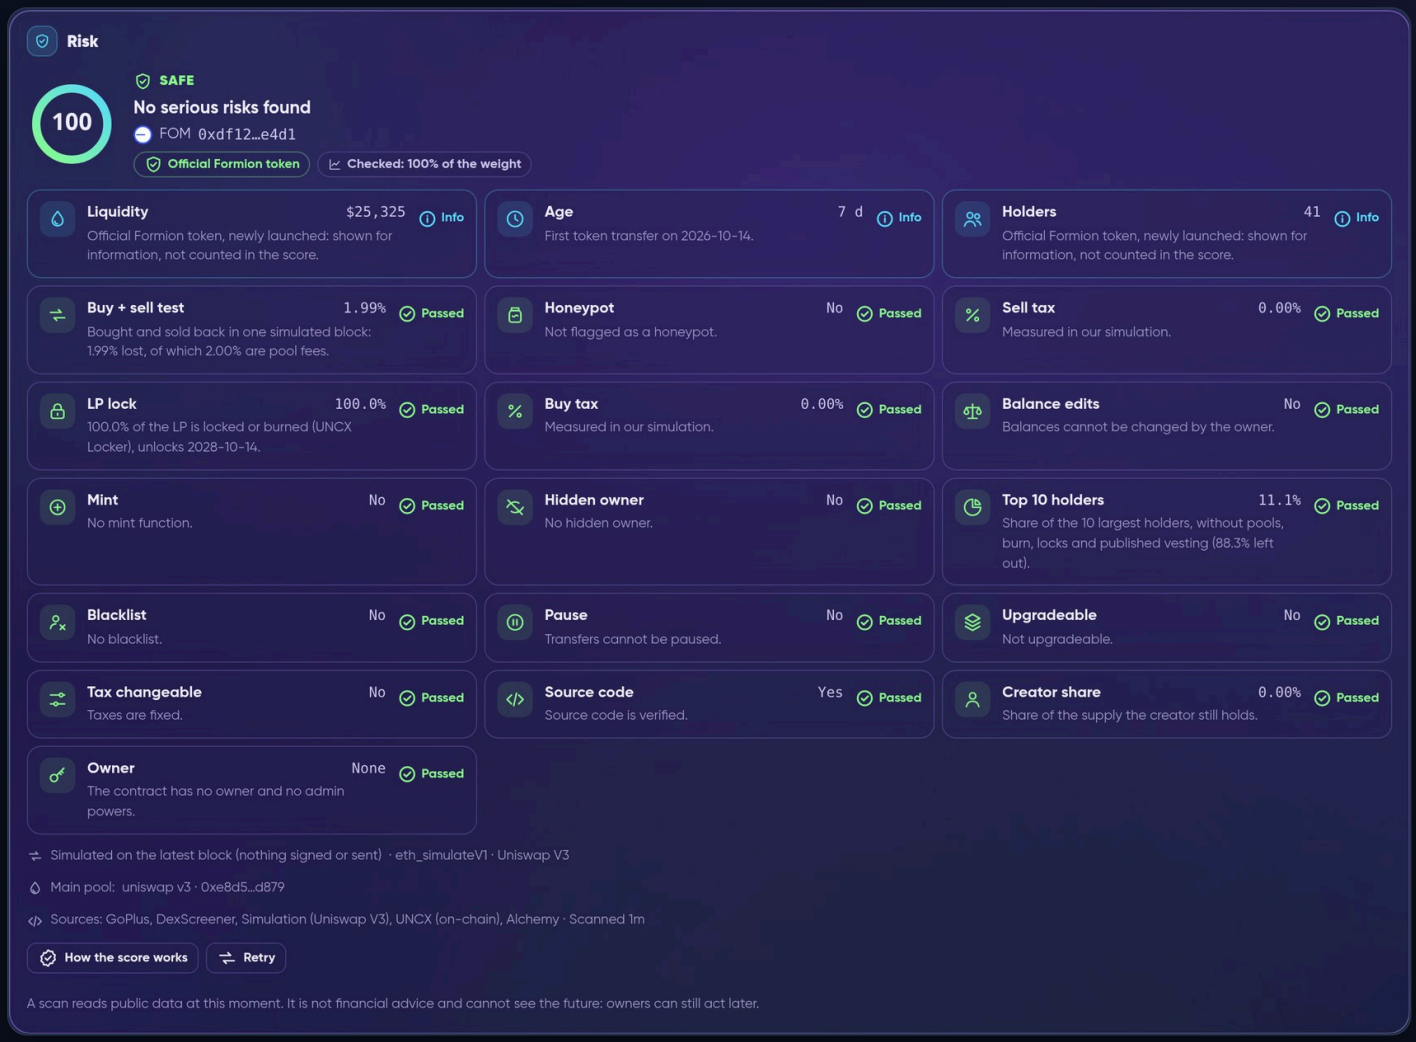

Holder bubble map: the largest holders sized by share; pools, locks and burn addresses coloured; links between wallets that traded the token.

Trades + maker filter | Top traders P&L | Whale trades + alerts | Holder history | Pools

07 · RISK SCAN

A score users can verify

Real screenshot · FOM example

FOM: 100 / Safe — every check passed, including our own buy + sell simulation on the latest block.

What we check

- Honeypot + a real buy and sell simulation
- Measured buy / sell tax, and whether it can change
- Mint, pause, blacklist, balance edits, proxy
- Owner and hidden owner
- LP locked or burned, and the unlock date
- Top-10 holders without pools, locks and vesting

A scan reads public data at that moment. It is not financial advice and cannot see the future: owners can still act later.

Unsafe tokens cannot buy a badge or any promotion, and live placements switch off when a daily re-check finds a risk.

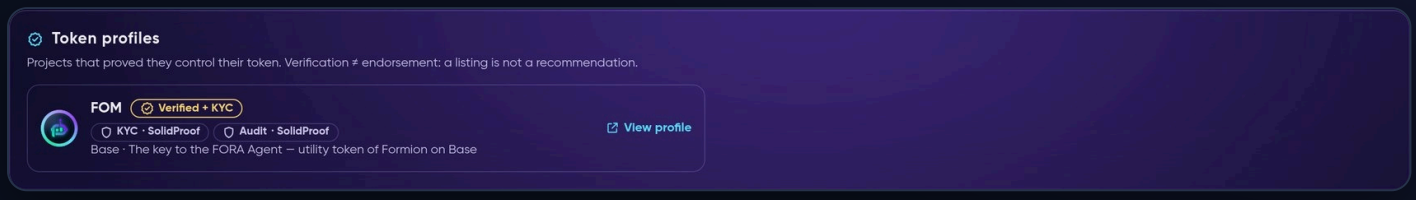

Sources: GoPlus, DexScreener, our own simulation, UNCX / Team.Finance on-chain lock data, Alchemy.

08 · COINS HUB

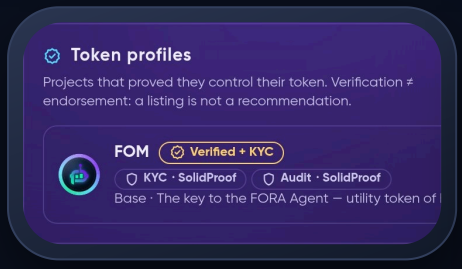

Seen on app.formion.ai too

Verified profiles appear in Coins Hub with the badge, KYC / audit chips, tagline and a "View profile" link straight to the project page. Gold profiles are listed first.

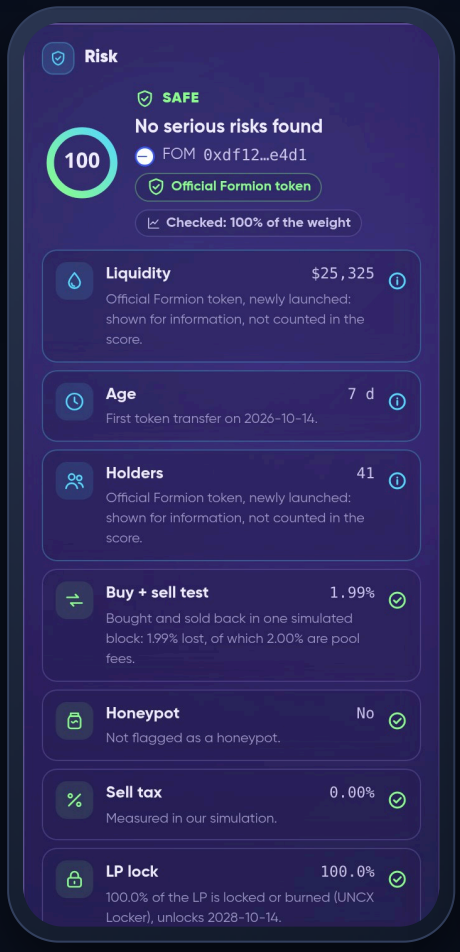

Real screenshot · FOM example

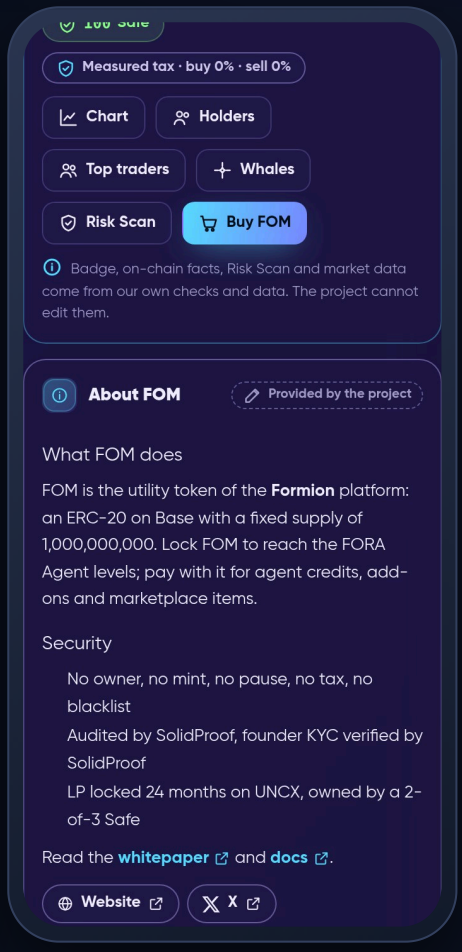

Coins Hub card, desktop 1440 px.

09 · PROMOTION

Promotion menu

Prices in USD. Pay in USDC, USDT, ETH — or FOM at −50 %. Every placement is clearly labelled.

PRODUCT	WHAT YOU GET	PRICE
Boost · Trending	Top of wallet Discover "Trending" and Coins Hub, labelled "Sponsored". Max 3 boosted at once — next free slot shown.	**$49 / 24 h** **$199 / 7 days**
Coins Hub listing	Full token card in Coins Hub: price, chart, Risk Scan, profile link.	**$99 once**
Banner	Top of Discover + Coins Hub, labelled "Ad". Max 2 at once. 1600 × 400 + mobile 800 × 400.	**$149 / week**
Spotlight · Project of the day	One project per day, own card in the wallet.	**$99 / day**
Sponsored post	X @FormionAI + Telegram channel + community group, tagged #ad. Max 2 per week.	**$199**
AMA in @formionaichat	Booked date and time, hosted in our community group, summary post after.	**$299**
Project Spotlight video	Produced to the Formion video standard, delivered to you, published on our channels on the Saturday you book.	**$499**
Mention in our weekly video	10–15 s segment in the Sunday weekly recap, labelled "Sponsored". Max 1 per week.	**$149**
Opt-in alert	Push / Telegram only to users who opted in to sponsored listings. Max 1 per day.	**$149**
Newsletter feature	Sponsored block in the Formion member newsletter — only to members who opted in.	**$199**
Project Pro	Owner dashboard: profile views, link clicks, holder growth, whale buys / sells, top traders, weekly report.	**$49 / month**
Follow token	Users follow your token for approved posts and big buys — and it feeds your Project Pro numbers.	**Free for users**

ⓘ Sponsored posts, AMA summaries and newsletter text are approved word for word by Formion before anything goes out. Spotlight videos go out on Saturdays only (one per Saturday, first come first served).

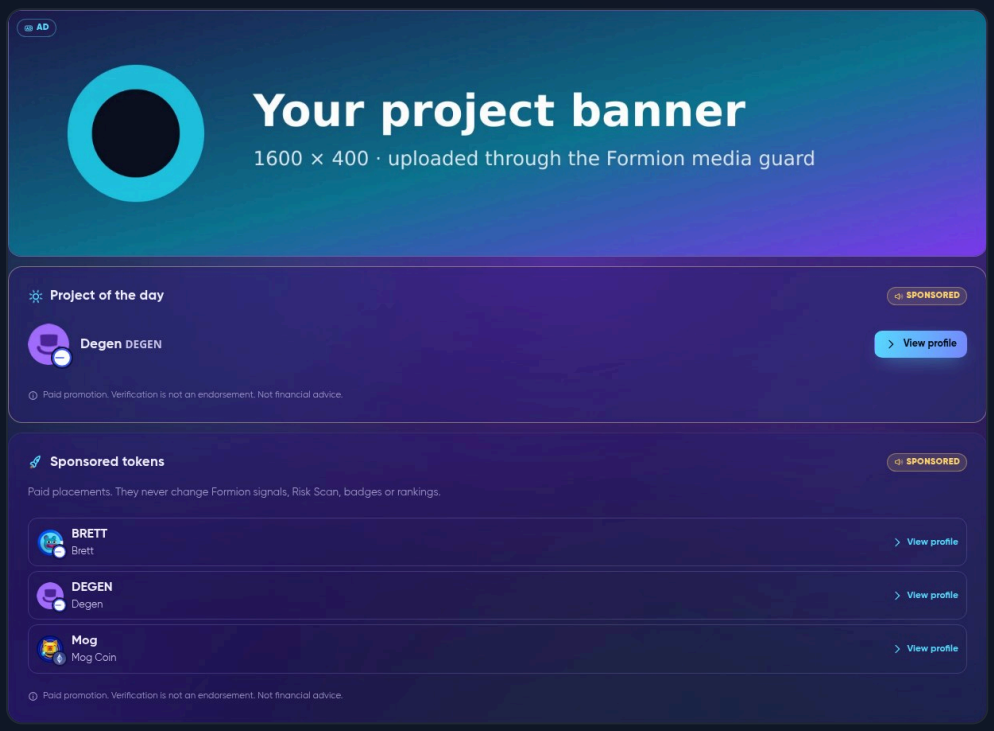

10 · PLACEMENTS

Where promotions appear

Real screenshots (example tokens). Every paid placement is labelled “Sponsored” or “Ad”.

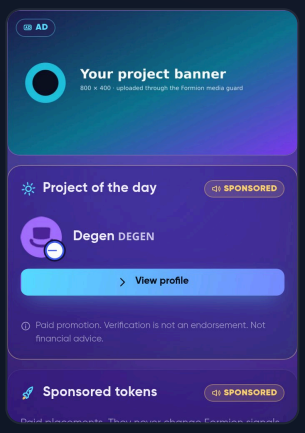

Wallet · Discover — banner, Project of the day, sponsored tokens

Real screenshot

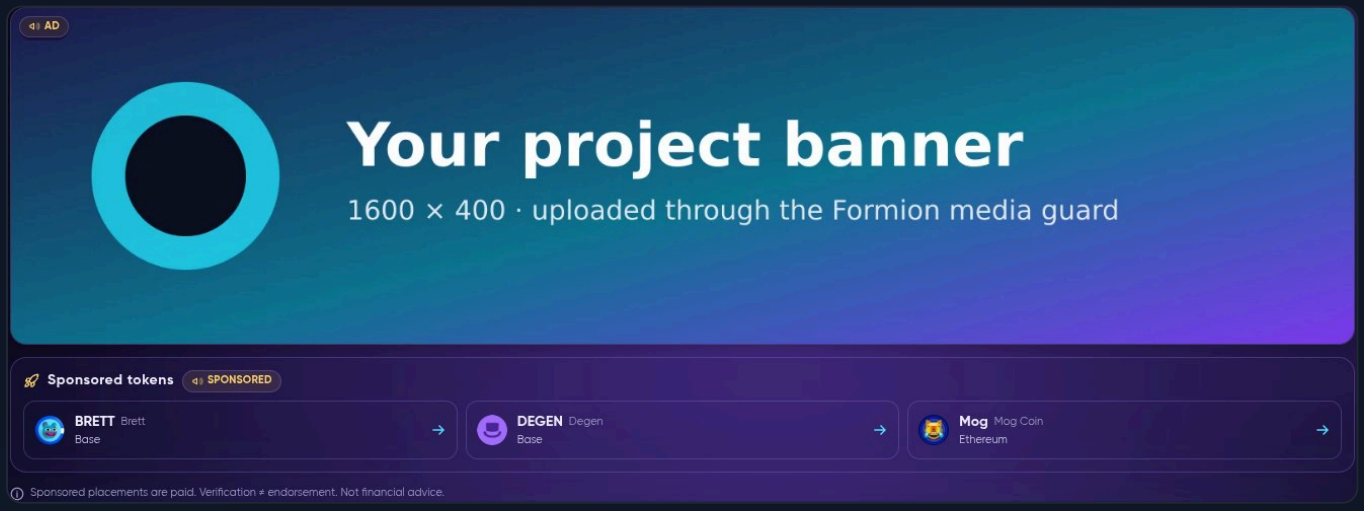

Mobile

Real screenshot

Coins Hub (app.formion.ai) — banner “Ad” + sponsored tokens strip

Real screenshot

Coins Hub listing

Real screenshot

Off-wallet placements

Boost max 3 at once · banner max 2 · one Project of the day. Opt-in alerts (push / Telegram, only to users who switched them on), sponsored posts on X and Telegram with #ad, the AMA, the newsletter block and the Saturday Spotlight video — every text approved word for word by Formion before it goes out.

11 · VIDEO, COMMUNITY, INSIGHTS

Beyond the wallet

Project Spotlight video · $499

A produced video about your project to the Formion standard: our intro, word-by-word captions, a professional English narrator, real logos only. You receive the file, and it is published on YouTube, our Telegram channel and group and X on the Saturday you book — one project per Saturday, labelled "Sponsored", with YouTube's paid-promotion flag set.

Weekly video mention · $149

A 10–15 second segment in our Sunday weekly recap, labelled "Sponsored", with YouTube's paid-promotion flag set. One project per week.

AMA in @formionaichat · $299

Pick a date and time; Formion confirms the slot and hosts the session in our Telegram community. A summary post follows (approved by Formion).

Newsletter feature · $199

A sponsored block in the Formion member newsletter, sent only to members who opted in to marketing email, with one-click unsubscribe.

Project Pro · $49 / month

- Profile views
- Link clicks
- Holder growth
- Whale buys / sells
- Top traders
- Follower count
- Weekly report
- E-mail / Telegram

Numbers come from our existing Explorer index and page counters — the same data users see.

A simple launch week — example order

D0	D1	D3	D5
Verified profile	Coins Hub + Boost	Sponsored post	AMA
Blue or Gold, page filled	24 h or 7 days on top	X + Telegram, #ad	In @formionaichat

An example only — pick any product on its own. Slots depend on availability and the safety check.

Follow token is free for users: followers get your approved posts and big-buy alerts, and your Project Pro dashboard counts them.

12 · RULES

Clear rules, for everyone

Always labelled
Every paid placement is visibly marked “Sponsored” or “Ad”. Sponsored posts carry #ad.

Safety check first
Only tokens whose Risk Scan is safe can buy a badge or a promotion.

Unsafe = off at once
We re-check every day. If a token turns unsafe, its placements are switched off immediately, with no refund. You accept this when you order.

Payment buys visibility only
FORA, signals, Risk Scan scores, badges and rankings are separated from payments in our code and can never be influenced by a purchase.

No UK placements
Sponsored placements are not shown to visitors from the United Kingdom (fail-closed: if the country is unknown, no ad).

No profit promises
Your texts must be clear and factual: no promised returns, no “guaranteed”, no price targets.

Opt-in only
Alerts and newsletters reach only users who opted in; every newsletter has one-click unsubscribe.

Approved word for word
Posts, AMA summaries and newsletter blocks go out only after Formion approves the exact text.

Verification ≠ endorsement
Shown next to every badge. A listing is not a recommendation or investment advice.

Refunds
Where a refund applies, Formion sends it on-chain from the receiving wallet; the transaction is checked before it is marked done.

✓ Before you order

- ✓ Your token has a pool on Base, Ethereum, Arbitrum or BNB Chain
- ✓ You can sign from the deployer / owner wallet, or post on your official X / website
- ✓ Your Risk Scan shows no honeypot or critical flag
- ✓ Your texts make no profit promises or price targets
- ✓ For Gold: KYC + audit page at an allow-listed provider, LP ≥ 90 % locked ≥ 12 months
- ✓ You pay from the order screen, with its unique amount

13 · HOW TO ORDER

From contract to live profile

1. **Open your token**
   wallet.formion.ai → Explorer → Tokens → paste your contract address (or open the link we send you).
2. **Add your profile**
   Logo, links, description, banner — then the project page sections. Everything autosaves; preview before you submit.
3. **Prove control**
   Sign a short message from the deployer / owner wallet, or post our one-time code on your official X account or website.
4. **Pay on-chain**
   Pick network and coin. You get a unique amount and a QR code; the status shows waiting → confirming → confirmed.
5. **Review and go live**
   Formion reviews the content and runs the Risk Scan. Approved profiles go live with their badge.
6. **Add promotion**
   Choose a product and slot, pay the same way, and we confirm the schedule. Text-based placements are approved word for word.

Payment

Base · Ethereum

NETWORK	ACCEPTED	CONFIRMATIONS
Base	USDC, USDT, ETH, FOM	10
Ethereum	USDC, USDT, ETH	12

- FOM: −50 % (Base only)
- Each order has its own unique amount — always pay from the order screen
- No card, no custody: you send from your own wallet
- ETH quotes are valid for 30 minutes

Contact

On any token page in the wallet, press **"Contact us for marketing"** — it opens a Marketing ticket with our team. Or open a ticket at **formion.ai/support** (category Marketing / Partnership).

formion.ai/support · @FormionAI · @formionai

14 · NOTES

Good to know

About this kit

- Prices are in US dollars and may change; the price shown on your order screen is final.
- Screenshots marked “Real screenshot” are taken from the live Formion Wallet and Coins Hub; FOM was set up as an example profile for this kit.
- Placement screenshots show example tokens in a test setup; your own logo, name and banner appear in their place.
- Features and availability can differ by country; sponsored placements are not shown in the United Kingdom.
- Generated 22 Oct 2026.

Disclaimer

Formion lists and promotes tokens for visibility only. A badge, profile, listing or promotion is not an endorsement, not investment advice and not a recommendation to buy. Crypto assets are volatile and can lose all value. Risk Scan results describe public on-chain data at the moment of the scan and cannot see future actions of a token’s owners. Users should always do their own research.

FORMION
